# Sami Halawa Ribas

## AI Instructor · Responsible AI & Governance Specialist

Madrid, Spain · EU work authorisation · +34 679 794 037 · sami@oulang.ai · samihalawa.com · linkedin.com/in/samihalawa · github.com/samihalawa

Implementation-first AI educator and product engineer who translates agentic systems, governance and operational risk into working examples, clear curricula and usable organisational practices in Spanish, English and Mandarin.

### CORE EXPERTISE

#### Teaching

Course design, live builds, practical exercises, executive communication and multilingual technical explanation

#### Responsible AI

AI governance foundations, EU AI Act, impact assessment, privacy, prompt-injection awareness, audit readiness and ISO 42001

#### Agent systems

MCP, RAG, multi-agent workflows, memory, tool use, deployment and observability

#### Product delivery

Python, FastAPI, TypeScript, React/Next.js, automation, document workflows and production operations

### CURRENT PROFESSIONAL EXPERIENCE

#### Founder & AI Product Engineer · Agents AI Ltd

Jul 2025–Present · Madrid / London

- Own product discovery, architecture, implementation, deployment, analytics, monetisation and operational handover across founder-led and B2B systems.
- Built OULANG, a multilingual marketplace and local-life platform for Chinese communities in Spain, across web, iOS and Android delivery.
- Built AutoClient and OULANG voice-agent workflows for multilingual outbound conversations, using live CRM/database context, automated post-call notes and follow-up updates; integrated Telnyx, email, WhatsApp and reusable MCP tooling.
- Delivered pricing-intelligence, decision-reporting, document-processing and multimodal review workflows with human review built into the process.

#### AI Instructor & Independent Technical Consultant

2022–Present · Madrid / Remote

- Teach practical AI, agents, MCP, automation, Python and product engineering through working applications, live builds and implementation-focused curricula.
- Translate business needs into systems and technical decisions for professionals and teams in Spanish, English and Mandarin.

# Technology → application → outcome

Technologies are connected to the products, platforms and workflows where they were applied, including Databricks Mosaic AI and production agent-system delivery.

## Agentic AI & orchestration

LangChain; LangGraph; MCP; tool/function calling; multi-agent collaboration; CrewAI; Agno; MemO; PydanticAI; structured outputs; model routing; prompt and evaluation loops; production APIs

### Applied in:

AutoClient, communications agents, VUDA, SMTP MCP, WhatsApp/GOWA and production agent workflows

## Retrieval, documents & multimodal AI

RAG; OCR; document ingestion; chunking/retrieval workflows; image-text review; computer vision; human-review checkpoints

### Applied in:

SORT course digitisation, AutoMedical, APOLO, AutoIOL/OCT workflows, reporting and recipe-intelligence prototypes

## Models & AI platforms

OpenAI; Anthropic; Gemini; DeepSeek; Hugging Face; open-source models; applied Databricks Mosaic AI coursework

### Applied in:

Production integrations and prototypes across product, automation, education and multimodal workflows, complemented by recent Mosaic AI coursework

## Backend & APIs

Python; FastAPI; TypeScript; Node.js; REST APIs; webhooks; SQL/MySQL; background jobs; authentication; integrations

### Applied in:

AutoClient, marketplace services, communications tools, pricing intelligence, client workflows and product APIs

## Web, mobile & interface delivery

React; Next.js; Tailwind CSS; Expo/React Native; SwiftUI; Ionic; Capacitor; responsive web; native/store delivery

### Applied in:

OULANG, Huatong, OUPIN, AutoDate, Tasky, Umbramed and more than 70 earlier web/mobile builds

## Voice AI, automation & communications

Telnyx; voice APIs; telephony; multilingual voice agents; live CRM/database context; post-call notes and follow-up; LangChain; LangGraph; n8n; MCP; email/SMTP; WhatsApp

### Applied in:

OULANG premium-user voice workflows, AutoClient, GOWA, SMTP MCP, outreach and operational automations

## Cloud, delivery & operations

Docker; Linux; CI/CD; Cloudflare; Coolify; Hetzner; working familiarity with AWS, Azure and GCP; deployment; logs; monitoring; cost control

### Applied in:

Operating production web/mobile systems, shared platform infrastructure, self-hosted services and client handover

## Data, analytics & commercial systems

SQL; product analytics; PostHog; GA4/GTM; Stripe; RevenueCat; payments; pricing/history data; reporting; experimentation

### Applied in:

OULANG monetisation and analytics, IWAKY/AutoPricing, marketplace intelligence, mobile subscriptions and campaign measurement

## Media, education & technical communication

FFmpeg; Sharp; After Effects; course design; live builds; technical writing; Spanish/English/Mandarin delivery

### Applied in:

SONMADE, a 373-video public catalogue, ChinoTotal and more than 125 recorded hours of AI instruction and technical workshops

# Core systems: architecture and implementation

Project-level examples connect the technology stack with ownership, implementation and operating outcomes.

## OULANG / Huatong / OUPIN

**TypeScript, React/Next.js, Expo/mobile delivery, SQL, payments, analytics, Cloudflare and containerised deployment.**

Designed and operated shared marketplace capabilities across identity, listings, search, messaging, monetisation, multilingual delivery and web/native release workflows.

## AutoClient & voice-agent systems

**Python/FastAPI, TypeScript/Node.js, Telnyx and custom voice APIs, LangChain/LangGraph, MCP, CRM/database context, email, WhatsApp, webhooks and background jobs.**

Built multilingual outbound calling workflows with personalised live context, conversational state, automated post-call notes, CRM follow-up and human handoff across voice and messaging channels.

## IWAKY / AutoPricing

**Marketplace data collection, Apify/Crawlab-style actors, product matching, price history, WhatsApp quote analysis, SQL/ERP inputs, dashboards and PDF reporting.**

Implemented pricing intelligence, marketplace analysis and decision-reporting workflows for B2C and B2B operations.

## VUDA & MCP toolchain

**TypeScript/Python, MCP, browser/UI diagnostics, image capture and annotation, SMTP, shell/browser/diff integrations.**

Published reusable developer tools; VUDA has earned 80 stars/7 forks and SMTP MCP has earned 17 stars/15 forks.

## AutoMedical / APOLO / ophthalmology

**Python, multimodal model workflows, image-text processing, OCR/computer vision, structured reporting and human review.**

Built medical-learning and image-review prototypes with structured reporting and human review.

# Full-stack, mobile, governance and media systems

The work spans AI and agent engineering, full-stack product delivery, platform operations, automation and technical instruction.

## Tasky / AutoDate / Umbramed

**SwiftUI, Expo/React Native, Ionic/Capacitor, React/TypeScript, authentication, sync, payments and release tooling.**

Built native and cross-platform products spanning productivity, consumer discovery and medical education.

## SORT & document intelligence

**PDF/OCR ingestion, structured extraction, RAG/chat interfaces, web publishing, APIs and background processing.**

Designed a workflow to turn course PDFs and unstructured source material into searchable, structured online learning experiences.

## PIME.ai / governance / instruction

**EU AI Act applicability and literacy workflows, ISO 42001/23894 concepts, impact assessment, RAG/agent architecture and multilingual curricula.**

Combined implementation-first instruction with governance products, responsible-AI methods and operational controls.

## SONMADE & media systems

**React/TypeScript, FFmpeg and Sharp; motion, colour, edge/text and full-screen-frame scoring.**

Built a scene-analysis and highlight-extraction prototype as part of a broader audio, transcription, video and creative-technology portfolio.

## Damehosting / Megawebs / Megacursos foundation

**Production web systems, Linux/server operations, CI/CD, code review, web/mobile delivery, SEO/acquisition and Adobe creative tooling.**

Built the engineering, operations, teaching and customer-delivery foundation behind later end-to-end AI product ownership.

# Engineering, product, operations and teaching

A career spanning software delivery, product ownership, technical operations, education and multilingual communication.

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                                           |

|-------------------------------------|--------------------------------------------|------------------------------------|--------------------------------------------------|

# Projects 1–23 of 85

Products, client engagements, open-source tools, applied research and teaching work.

## 1. RealSintra software product

Early software product combining web development with AI-assisted functionality.

## 2. Mi ChatGPT React Español

Spanish-language React interface for experimenting with conversational AI.

## 3. OpenAI / GPT document tools

OpenAI and GPT file-processing tools for structured document workflows.

## 4. DameSender continuity

Email delivery and outreach tooling that established an early automation product line.

## 5. Aprende IA / IA Megacursos

AI education and course-production work supported by a 373-video public technical catalogue.

## 6. MenuEditorElectron

Electron desktop utility for editing and managing structured menu content.

## 7. AI Absolut and prompt research

Applied prompt, system-instruction and generative-AI research across GitHub and Hugging Face.

## 8. Email crawler and lead tooling

Web crawling, lead research and email-automation utilities for commercial workflows.

## 9. macOS Optimizer

Open-source macOS storage and maintenance utility with 13 stars and 1 fork.

## 10. CloudflaredMe

Cloudflare Tunnel utility for faster local-to-public development workflows.

## 11. AutoCrypto

Crypto automation and progressive-web-app product exploration.

## 12. Audio and transcription tooling

Speech, audio-processing and transcription utilities used across later automation workflows.

## 13. KittyTasks / FocusOnTask

Productivity experiments for task management, focus and lightweight personal workflows.

## 14. AutoClient seed work

Early AutoClient research and automation work for AI-assisted customer acquisition.

## 15. InfiniteStorageFace / Pollinations experiments

Generative-interface and storage experiments using Pollinations and related services.

## 16. AutoVideo, MedSAM and AutoTraining exploration

Prototype work spanning generative video, medical segmentation and model-training workflows.

## 17. AutoIOL

Ophthalmology-oriented product exploration for lens, image and clinical-workflow support.

## 18. SpeakingAI

Speech and conversational-AI product experiment.

## 19. AutoClient monorepo and worker expansion

Expansion of AutoClient into a modular platform with workers and automation services.

## 20. EyeUnit / Fernando Ly medical AI

Commercial medical-AI, OCT and market-intelligence collaboration with EyeUnit / Fernando Ly.

## 21. Light Funnels AI training

AI training engagement involving applied automation and commercial workflows.

## 22. Hugging Face technical writing

Technical writing on AI, prompting, automation and agent systems for Hugging Face.

## 23. Applied AI research

Applied research across multimodal AI, model evaluation, automation and agent-system engineering.

# Projects 24–46 of 85

Products, client engagements, open-source tools, applied research and teaching work.

## 24. SORT / SortBot

Course-PDF digitisation workflow with structured lessons, chatbot support and web publishing.

## 25. AutoHSK and language-learning tools

AI-assisted Mandarin and HSK learning tools connecting language expertise with software.

## 26. Blog and content system work

Technical publishing systems for articles, product education and searchable web content.

## 27. SMTP MCP Server

Open-source email and mailbox integration for agent workflows, with 17 stars and 15 forks.

## 28. Shell, browser and diff MCP tools

Reusable MCP tools for shell, browser, editor and code-diff workflows.

## 29. Ophthalmology workflows

Continuing ophthalmology work spanning image review, OCT workflows and structured reporting.

## 30. Hugging Face articles

Twelve public Hugging Face articles covering automation, agents and multimodal AI.

## 31. APOLO multimodal medical AI

Public image-text medical research model based on DeepSeek-VL2-tiny.

## 32. VUDA

Visual UI Debug Agent MCP for capturing, annotating and reasoning about interface defects.

## 33. AutoTutorial, MentorIA and PerfectPrompter

Guided-learning and prompt-engineering product family for practical AI education.

## 34. Scope / account intelligence prototype

Account-list merging, cross-sell discovery and clinical-market scoring prototype.

## 35. Fernando Ly medical-AI teaching and research

Applied medical-AI teaching and research collaboration focused on OCT workflows.

## 36. AutoClient expands

Growth of AutoClient into a broader research, enrichment, outreach and CRM platform.

## 37. Open-source MCP toolchain

Concentrated open-source release cycle for MCP, browser, shell, email and agent integrations.

## 38. Agents AI Ltd

AI product and consulting company supporting platform, automation and client-delivery work.

## 39. Lanzadera ecosystem participation

AutoClient participation in Lanzadera's startup and technology-partner ecosystem.

## 40. APOLO / AutoMedical product development

Medical-AI product development for learning, multimodal review and professional workflows.

## 41. Agent tools and operating utilities

Reusable utilities for automation, memory, deployment, browser control and developer operations.

## 42. AutoRad

Radiology product concept for image review, structured reporting and clinical collaboration.

## 43. Personal and company site work

Engineering and publishing work across personal, portfolio and company websites.

## 44. WhatsApp MCP / automation

WhatsApp API and MCP integrations for messaging, history, media and operational automation.

## 45. IWAKY / AutoPricing

B2C/B2B pricing platform covering marketplace intelligence, WhatsApp quotes, ERP commerce and reporting.

## 46. INTLAW legal AI

Designed a legal-AI workflow covering prospecting, multichannel intake and multi-agent case analysis.

# Projects 47–69 of 85

Products, client engagements, open-source tools, applied research and teaching work.

## 47. San Martín HR automation proposal

Designed HR automation covering birthdays, timesheets, talent search and employee-portal workflows.

## 48. Umbramed / Valerio

Technical leadership for an Ionic/Capacitor medical-education product, PWA delivery, data workflows and payments.

## 49. AutoTinder / AutoDate design generation

Product design and automation work that evolved from AutoTinder concepts into AutoDate.

## 50. Cross-sector prototype portfolio

Prototype portfolio spanning proposals, commerce, health, messaging, pricing, media and operations.

## 51. Sami Halawa poetry website

Web collection of 72 original poems with navigation, export and media experimentation.

## 52. Lemon AI deployment/customization work

Deployment, identity, landing-page and infrastructure customization for the Lemon AI platform.

## 53. 15-hour AI-agents course

Fifteen-hour AI-agent curriculum covering tools, memory, multi-agent systems, RAG and deployment.

## 54. OULANG

Multilingual marketplace and local-life platform for Chinese communities across web, iOS and Android.

## 55. OULANG monetisation and analytics

OULANG monetisation, analytics, subscriptions, payments and commercial-operations workstream.

## 56. Umbramed product development

Umbramed product development spanning PWA delivery, medical data, connectors, payments and mobile applications.

## 57. Skills and tooling publishing

Publication of reusable agent skills, browser workflows and MCP infrastructure.

## 58. GOWA

WhatsApp automation and API platform for operational messaging workflows.

## 59. Notion–Drive synchronization

Open-source synchronization between Notion workspaces and Google Drive.

## 60. OULANG web, native and monetisation

OULANG web and native development spanning marketplace flows, payments, SEO, analytics and store delivery.

## 61. Huatong

Multilingual employment and local-services platform for Chinese users across European markets.

## 62. InfoHuaxin

Customer-facing web product, data integrations and operational tooling.

## 63. OUPIN

Multilingual consumer and property-discovery platform using shared marketplace infrastructure.

## 64. Crawlalab / Apify actor fleet

Crawlalab and Apify data-collection actors with central storage and downstream product consumers.

## 65. AI development context tools

Context-management and activity-analysis tools supporting complex AI-assisted development workflows.

## 66. Telnyx voice/communications tools

Telnyx and custom Voice API integrations for telephony, agent state, real-time business context, post-call outputs and reusable communications tooling.

## 67. Desktop Commander and operations skills

macOS, browser, CRM and deployment automation utilities for technical operations.

## 68. VibraCode

Deployed web product and development environment for rapid application building.

## 69. AutoMedical platform

Medical-AI platform for multimodal learning and structured workflows.

# Projects 70–85 of 85

Products, client engagements, open-source tools, applied research and teaching work.

## 70. Portfolio and company websites

Portfolio, company, product and publishing sites across Sami Halawa, PIME.ai, Agents AI Ltd and ChinoTotal.

## 71. Tasky

Native SwiftUI Google Tasks client for macOS, iOS and iPadOS with widgets, extensions and sync.

## 72. AI tutoring and professional training

AI teaching, course design and commercial training operations with ITE and TusClasesParticulares.

## 73. OULANG World Cup / sports-live module

World Cup module with predictions, standings, results and live-room functionality.

## 74. SONMADE content factory

React/TypeScript, FFmpeg and Sharp prototype for scene analysis and video-highlight extraction.

## 75. AutoDate web and TestFlight

Dating product with a live web experience and an iOS build distributed through TestFlight.

## 76. Recipe intelligence platform with José Olivares

Product discovery and architecture for digitising, enriching, publishing and illustrating professional recipes.

## 77. Tekçe / OULANG-AutoClient property growth

Designed a property-growth workflow for qualified Chinese buyers, transparent CRM handling and personalised AI outreach.

## 78. OULANG native parity and store delivery

Web-to-native feature parity, marketplace, payment and store-delivery work for the current OULANG application.

## 79. EA Housing / Radio Inter digital architecture

Designed modular web and product architecture for EA Housing and Radio Inter.

## 80. Chinese soundscapes, tutoring materials, lessons and poetry audio

Mandarin soundscapes, vocabulary materials, tutoring exercises and Spanish poetry audio.

## 81. PIME.ai EU AI Act compliance pack

Multilingual EU AI Act service covering applicability, risk analysis, AI literacy and implementation roadmaps.

## 82. ClipKing / UseraLegal / Aida Facturas / IRSushi

Additional product initiatives including ClipKing, UseraLegal, Aida Facturas and IRSushi.

## 83. EVA AI/admin automation training consultation

AI and administration-automation training consultation covering Copilot, browser workflows and task systems.

## 84. Mike Lepcsik lead-generation/business-automation consulting

Lead-generation and business-automation consulting covering n8n, Close CRM, enrichment and MCP architecture.

## 85. SOLMADE fashion AI and commerce strategy

Fashion and commerce product strategy spanning branding, web/app delivery, SEO, AI imagery and advertising.

# Formal learning and professional qualifications

International and technical education plus professional qualifications across AI engineering, governance, automation and quantitative methods. The 19 recent credentials shown below were issued in July 2026; Microsoft AI-900 and Adobe certification are earlier professional credentials.

## EDUCATION & LANGUAGES

|                                                                                                                                                                                                                                                                                                                    |                                                                                                                                                                                                                                                                                |

# AI, governance, automation and quantitative learning

Professional qualifications issued in July 2026 across agent engineering, responsible AI, automation and quantitative methods.

## Investment Management with Python and Machine Learning

- Introduction to Portfolio Construction and Analysis with Python · K3YYB6E213GY
- Advanced Portfolio Construction and Analysis with Python · PI2VZASXJ2NR
- Python and Machine Learning for Asset Management · XWMR6R7BFW7F
- Python and Machine-Learning for Asset Management with Alternative Data Sets · 5SL26L5XFIRY

## Data Privacy, Ethics, and Responsible AI

- Building Trust: Ethics for AI-powered Chatbots · KHC24ZIMD4UP
- Fundamental Rights Impact Assessment for GenAI Projects · NWLPDHLE4SQA
- User Awareness and Education for Generative AI · 6ZH2XSY4X1VY
- Introduction to Prompt Injection Vulnerabilities · 92DG3JSOPHXL
- Data Privacy and Protection Standards · 69T2HK10MCBW
- AI and European Union Law: Navigating Regulatory Compliance · CXKRGYMZBWL6

## AI Automation Engineer with n8n

- Workflow Automation with n8n: Logic, Data & Error Handling · 0U3L8YXLIGLK
- Integrate AI Models in n8n: Prompt Engineering & Outputs · SYLD77A55WBO
- Build AI Agents & Secure API Integrations with n8n · SAFAGPUKDIL7
- AI Memory Systems: Production RAG Pipelines with n8n · KU3W35C54Z9T
- Build MCP Automation Projects with n8n: Connect AI Clients · X7YFWSUKK69U
- Multi-Agent Systems Design: AI Customer Support with n8n · MJX0L3XJ82K2
- Deploy, Test & Secure AI Workflows with n8n · LPN041O3NGGZ

## Managing AI Systems: Development, Deployment, and Governance

- AI Systems Design: RAG Pipelines and LLM Architecture · P9ZUHTTKQ546
- MLOps and LLMOps: Deploying and Scaling AI in Production · 5XRHG7TPQ6IR
- AI Risk and Compliance: Audit and Governance Foundations · N6UE7DP7T104

## AI Governance & ISO 42001 Readiness for GRC, Audit, & Legal

- ISO/IEC 22989:2023 An Introduction to the Fundamentals of AI · 0YTL5PHGC005
- AI System Impact Assessment Guidance · JG2DXNZ66KGO
- AI Management Essentials: Integrating ISO 42001 & ISO 23894 · I61HD0HLKVAB
- Understanding the Foundations of the EU AI Act · X5JU1YKW8B9S
- Approaches to Establish Trust in AI Systems · U6ZLGVCCLZ5H5

## Building and Deploying AI Agents with LLMs and LangChain

- AI Agent Architecture: Reasoning, Memory, and LangGraph · SO0LO9NOCFXF
- Designing Multi-Agent Systems: Collaboration and Workflows · ORYP5BAAR0KO
- Deploying AI Agents: LLMs, LangGraph, and Production APIs · WFOU01N1PLP7

# AI strategy, security and production MLOps

Professional qualifications issued in July 2026 across AI governance and strategy, secure AI systems, model serving, cloud deployment and machine-learning operations.

## Agentic AI Engineering

- Building Your First AI Agent with LangChain · Edureka · 33RUZ15SP0ZU
- Applied Agentic AI Pipelines with LangChain · Edureka · Z9JGKO7KWQ6A
- Multi-Agent Systems with LangGraph · Edureka · C8KPTX6U5B6C
- Developing MCP-Powered Agentic AI Systems · Edureka · PEGPNFWLRNHG
- Specialization certificate · Edureka · GZ2Q50QNLE6N

## AI Foundations for Business Professionals

- AI Governance · Saïd Business School, University of Oxford · BNQDJXKCD1O5
- Generative and Agentic AI · Saïd Business School, University of Oxford · VNIB5TAX5SVF
- AI Essentials · Saïd Business School, University of Oxford · LMTNWRB8U84N
- Specialization certificate · Saïd Business School, University of Oxford · LWTECCK71WBO

## CompTIA SecAI+ (CY0-001) Certification Exam Prep

- Advanced AI Security, Automation, Governance, and Compliance · Packt · INDPFS30V3OV
- AI Security Architecture, Controls, and Defensive Operations · Packt · 1SF8VGAOC9CM
- AI Foundations and Secure AI Fundamentals · Packt · D4JLEZG41RLX
- Specialization certificate · Packt · Q4IYZTSRNUTN

## Machine Learning Operations (MLOps)

- Model Serving Systems: Containers, APIs & Scalability · Board Infinity · HVVGUCUZZ6A5
- Cloud Platforms for ML: AWS, Azure & GCP Deployment · Board Infinity · VXCX7BOCN5EK
- DevOps for Machine Learning: CI/CD, APIs & Deployment · Board Infinity · PEL4KC01Y3UU
- Specialization certificate · Board Infinity · 3HZCX9EHMFMO

## Additional qualifications

- Databricks Mosaic AI · RRXO8HSACR29
- Foundations of AI Governance and Responsible Development · LearnQuest · 8STVBR62T6CY

# Achievements beyond the role description

Scholarship, creative recognition, publishing, open source, product delivery and technical teaching.

## ACHIEVEMENTS & RECOGNITION

### Rafael del Pino Foundation scholarship

Named in the Foundation’s official 2012 annual report for study at Li Po Chun United World College of Hong Kong.

### Youth Prize · II Nogarejas Poetry Competition

Awarded in 2012 for “Olvidaste una llave en mi costado”, submitted as “El arte de la fuga”, from an international field of more than 200 works.

### Published author · ChinoTotal

Wrote and independently published a 296-page Spanish-language Mandarin course from zero to HSK2/A2 in 2024. ISBN 9798873249237.

### Open-source engineering recognition

VUDA has earned 80 GitHub stars / 7 forks, while the SMTP MCP Server has earned 17 stars / 15 forks.

### Multiplatform product delivery

Built OULANG across production web and native iOS/Android delivery, then extended the platform approach into Huatong and OUPIN.

### Technical teaching and communication

Delivered more than 125 recorded hours of AI instruction, product workshops and technical implementation sessions, alongside 12 public Hugging Face articles.

## HOW I TAKE AN AI SYSTEM TO PRODUCTION

### 01 Discover

Problem, users and objectives

### 02 Design

Architecture and controls

### 03 Build

Models, data, APIs and UI

### 04 Operate

Deploy, observe and improve

### 05 Transfer

Document, teach and hand over
