

Sami Halawa

OPEN TO WORK — Senior AI Engineer & Technical Lead with 12+ years in software and 6+ in Python. I build product-ready agentic AI and LLM/RAG platforms: FastAPI, Node/TS, LLMOps, observability, GCP and cloud delivery.

Madrid, Spain

+34 679 794 037 | sami@samihalawa.com | [linkedin.com/in/samihalawa](https://www.linkedin.com/in/samihalawa) | samihalawa.com | github.com/samihalawa

Summary

Senior AI Engineer and Technical Lead available for full-time, contract, hybrid or remote roles.

Profile: Spanish National · Python & Full Stack: 12 years · ML & AI: 6 years · AWS, Google Cloud & DevOps: 8 years

Senior / Lead AI Engineer and systems architect specialising in building production agentic AI systems — multi-agent workflows, RAG and MCP systems that operate real businesses across web, iOS and Android. I deliver projects with explicit state management, tool-calling schemas, structured outputs, evaluation checkpoints, observability, and human review.

Selected Results: OULANG — 17,262 users, 38,857 listings, 89,913 contact reveals · AutoClient — selected by Lanzadera (2025), 200+ qualified contacts in 2 weeks, 30% sales conversion lift · VUDA — 80 GitHub stars · Pricing-intelligence delivery — €35,000 signed contract · 116 verified credentials (IBM, Microsoft, Google, Stanford, BSI ISO/IEC 42001)

Open Source & Teaching: npm — [visual-ui-debug-agent-mcp](#) (900+ installs), [email-smtp-imap-mcp](#) (1,700+ installs) · YouTube — 170,000+ subscribers ([@samihalawa](#)), teaching AI, agents, MCP and coding in Spanish and English

App Store Presence: Apple App Store (Agents AI Ltd) · Google Play (OULANG, Huatong, InfoHuaxin) · Shopify App Store (RapidAct) · Wix App Market

Languages & Location: Delivering in English, Spanish and Mandarin · Based in Madrid, Spain

Open To Roles: Senior AI Engineer · Lead AI Engineer · AI Platform / Agentic AI Engineer · Portfolio: samihalawa.com

Experience

Agents AI Ltd

Founding AI Engineer & Systems Architect

July 2025 - June 2026 (1 year)

Madrid, Spain

Founder-led AI product and delivery work through UK-registered Agents AI Ltd. • Carried AutoClient AI through the Lanzadera accelerator programme (Sep–Nov 2025). • Built and delivered OULANG for a client (Dec 2025 – Jun 2026): a multilingual platform across web, iOS and Android with 17,262 registered users, 38,857 listings and 89,913 contact reveals at delivery. • Owned the ML/data/serving loop: semantic search for a 39K+ multilingual corpus (near-duplicate collapse, language ID, embedding-based retrieval, model routing), evaluation with golden query sets and LLM-as-judge rubrics, PostHog/BigQuery telemetry, error slicing and zero-result monitoring. • Migrated infrastructure from cloud to self-hosted (Hetzner + Coolify + Docker) for major cost reduction. • Delivered agentic and multi-agent systems with durable state, tool calling, structured outputs, evaluation checkpoints and human review. • Partner collaboration: IWAKY/AutoPricing pricing-intelligence case study (ai.iwaky.net). • Published open-source MCP servers on npm: visual-ui-debug-agent-mcp and email-smtp-imap-mcp. • Shipped end-user apps to the Apple App Store, Google Play, Shopify App Store and Wix App Market. • Additional ML / LLMops scope during this same delivery period: Own the ML/data/serving loop for production systems: data curation, embeddings and retrieval, model serving, evaluation, and infrastructure cost optimization. • Built semantic search for a 39K+ multilingual (Chinese/Spanish) listing corpus: near-duplicate collapse, language ID, spam/quality heuristics, embedding-based retrieval with Vertex AI Search and Gemini routing. • Migrated ML infrastructure AWS → GCP/Vertex (GKE, AlloyDB, Cloud Run, BigQuery) → self-hosted Hetzner/Coolify/Docker, reducing spend from ~€18K/mo (peak ~€40-50K/mo with API costs) to ~€200/mo. • Designed FastAPI inference services with AsyncIO fan-out for embedding/LLM jobs, SSE streaming, prompt/embedding caching, and model routing across Gemini, OpenAI, DeepSeek, and open-source models. • Published APOLO medical multimodal research model on Hugging Face (DeepSeek-VL2tiny for OCT/fundus image-to-text with human review) as part of a paid clinical collaboration (€32K+). • Built feature-driven pricing intelligence: marketplace data collection, feature extraction, price-band scoring with human review policy, and ERP write-back (€35K signed scope). • Developed multi-agent worker pipelines with structured outputs (Pydantic), MCP tools, LLM-as-judge evaluation, production tracing, and CRM write-back — selected for Lanzadera accelerator (Sep 2025). • Evaluation stack: golden query sets, LLM-as-judge rubrics, PostHog/BigQuery telemetry, error slicing by language/source, zero-result rate monitoring. Stack: Python, PyTorch, HuggingFace, FastAPI, Pydantic, LangChain/LangGraph, Vertex AI, GKE, AlloyDB, BigQuery, Docker, vLLM/Ollama, CUDA, PostHog, Apify/Crawlab.

AutoClient AI

Founder & Agentic AI Systems Architect — AutoClient

March 2024 - July 2025 (1 year 5 months)

Madrid, Spain

Founded AutoClient to replace disconnected sales automations with one traceable account-context system. Built the product from Mar 2024 to Jul 2025 and carried it through the Lanzadera accelerator programme (Sep–Nov 2025) under Agents AI Ltd. • Architected the shared context layer spanning account research, enrichment, qualification, CRM execution and next-action planning. • Implemented tool-calling workflows with Python, APIs and MCP, adding structured outputs, checkpoints, CRM write-back and traceable execution. • Preserved account state across CRM and database context so research, post-call notes and follow-up remain continuous between channels. • Coordinated email, LinkedIn, WhatsApp and voice around that shared context, with review before external action. • A public LinkedIn recommendation (15 July 2025) cites a validation customer reaching 200+ qualified contacts in two weeks and a 30% improvement in sales conversion with AutoClient.

AutoMedical

Medical AI Product & Systems Architect — AutoMedical

February 2025 - July 2025 (6 months)

Madrid, Spain

Founded AutoMedical as a self-directed medical-AI research and learning product for multimodal review, structured reporting and professional education, developed with students and refined through feedback from medical specialists. • Architected APOLO as two stages: structured visual analysis followed by downstream classification and explicit reasoning. • Separated model observations from workflow reasoning so intermediate outputs remain inspectable. • Developed AutoIOL and MedSAM-based ophthalmology workflows for image review and structured reporting. • Fine-tuned an open-source DeepSeek vision-language model (APOLO) for glaucoma and OCT image-to-text, with MedSAM segmentation and radiography report generation (AutoRad). • Served models via FastAPI and Hugging Face inference, with privacy-oriented on-premise deployment and no external LLM APIs. • Defined evaluation checkpoints and human review before interpretation or downstream use. • Collaborated with clinicians on evaluation and human review.

Independent

AI Systems Architect & Independent Technical Advisor

July 2022 - July 2025 (3 years 1 month)

Madrid, Spain

Designed and delivered applied-AI systems from discovery through deployment, evaluation and operational handover. • Architected agentic, RAG, MCP, API, SQL and cloud workflows with explicit state, structured outputs and review boundaries. • Developed legal-tech workflow systems for omnichannel intake and case-file analysis. • Published Article 50 engineering guidance and developed EU AI Act transparency and product-engineering materials through RapidAct and PIME.ai. • Engineered evaluation, observability, human review and regulatory transparency as first-class constraints from the first design decision. • Translated architecture into implementation decisions for technical and non-technical stakeholders in Spanish, English and Mandarin. • Published technical guides on autonomous coding agents, multimodal medical AI, visual UI debugging and AI transparency. • Built INTLAW legal-document RAG (omnichannel intake, case-file analysis, GraphRAG) and insurance risk-prediction models. Stack: Python, FastAPI, RAG/GraphRAG, vector search, LangChain/LangGraph, MCP, Docker, CI/CD (GitHub Actions), PostHog; Google Cloud (Vertex AI, Cloud Run), AWS, Azure.

Fernando Ly / EyeUnit

AI Product & Medical Workflow Architect

August 2024 - June 2026 (1 year 11 months)

Madrid, Spain

Medical-AI research and workflow collaboration with ophthalmology clinician Fernando Ly (EyeUnit), connected to the AutoMedical and APOLO product line and developed through specialist feedback. • Built OCT and ophthalmology workflow systems for multimodal image review, longitudinal tracking and structured reporting with clinician review integrated into the workflow. • Translated specialist requirements into clear data flows, interfaces and structured outputs. • Designed privacy-conscious data handling with human review before interpretation or downstream use.

Umbramed / Valerio Trigos

Technical Lead & AI Engineering Mentor

July 2025 - June 2026 (1 year)

Madrid, Spain

Led technical architecture, AI mentoring and hands-on delivery for Umbramed, Dr. Valerio Trigos's medical-education platform. • Led Ionic, Capacitor and PWA architecture, mobile installability, delivery and recovery. • Designed exam-data workflows from PDF-to-JSON/Airtable ingestion through bulk upload, medical-question databases and reusable extraction tooling. • Delivered integrations, analytics, app packaging, troubleshooting and technical prioritisation. • Mentored AI-assisted development, prompt systems, interface design and iterative product implementation.

MelindaAI

AI Product Lead

July 2023 - December 2024 (1 year 6 months)

Built and shipped consumer AI products with collaborators during my independent practice, including MelindaAI, KittyAI, Sharedetect and ZebraMenu. • Designed and delivered user journeys, interfaces and AI-assisted interactions across consumer and social use cases. • Published production web applications and iterated product positioning, interaction design and delivery. • Applied the product and engineering foundations from these builds to later agentic and cross-platform systems.

Damehosting

Senior Full-Stack Engineer

July 2019 - July 2023 (4 years 1 month)

Developed and maintained production web platforms, backend services and operational integrations. • Built and supported APIs, database-backed features, automation workflows and customer-facing web systems. • Improved delivery through code review, CI/CD practices, Linux and server operations, monitoring and incident troubleshooting. • Worked across frontend, backend, infrastructure and deployment boundaries to keep releases reliable. • Collaborated with stakeholders and mentored developers through implementation and production support.

Megawebs

Technical SEO & Web Platform Engineer

July 2016 - July 2023 (7 years 1 month)

Led technical SEO, web architecture, content and acquisition work across the Megawebs portfolio. • Improved site structure, crawlability, on-page relevance and search-oriented content for web products and client projects. • Connected SEO strategy with web development, analytics, content production and conversion-focused user journeys. • Built and maintained sites within a wider portfolio of more than 70 digital projects. • Developed the search, publishing and product-discovery foundation later applied to AI products and multilingual marketplaces.

Megacursos.com

14 years 1 month

Full-Stack Product Engineer & Technical Educator

July 2016 - July 2023 (7 years 1 month)

- Delivered web, mobile and digital products from concept through launch and maintenance across a long-running portfolio of more than 70 projects.
- Produced long-form technical course series including 72 lessons / 90 hours of After Effects, 51 lessons / 70 hours of Illustrator and 42 lessons / 35 hours of Nuke.
- Built reusable project-based training across After Effects, Photoshop, Cinema 4D, web production and product skills, using focused websites, dashboards and automation builds as practical student labs.
- Led technical SEO, content, acquisition and conversion work alongside hands-on implementation.
- Combined customer delivery, teaching and production to create the technical and communication foundation later applied to AI systems and product engineering.
- Led remote engineering teams, coordinated cross-functional delivery across teams of up to 50 people and mentored developers; delivered enterprise AI upskilling and technical training across React, Next.js, Node.js, Python and the Adobe suite (After Effects, Illustrator, Cinema 4D).

Technical Course Instructor & Producer

August 2013 - August 2019 (6 years 1 month)

Madrid

Produced and taught long-form, project-based technical courses for public learners.

- Structured complete learning paths from fundamentals through finished production work.
- Published 72 lessons / 90 hours of After Effects, 51 lessons / 70 hours of Illustrator and 42 lessons / 35 hours of Nuke.
- Combined software instruction, production workflows and reusable exercises across video, compositing and design.

Digital Design Instructor

July 2009 - July 2016 (7 years 1 month)

Madrid, Spain

Taught practical digital-design and production workflows through project-based instruction.

- Built reusable learning material across After Effects, Photoshop, Illustrator and Cinema 4D.
- Translated complex tools into step-by-step exercises, demonstrations and finished visual work.
- Connected design instruction with real web, content and product-production workflows.

China Media & Live Production

Presenter & Live Host

July 2015 - July 2017 (2 years 1 month)

China

Delivered multilingual on-camera presentations and live content in China. Worked across production teams and public-facing formats, strengthening concise communication, cultural adaptability and live delivery.

China Media & Commercial Production

Commercial Model & Actor

July 2013 - July 2017 (4 years 1 month)

China

Worked in commercial modelling and acting assignments in China. Developed on-camera discipline, production awareness and cross-cultural communication across commercial media work.

Education

The University of Hong Kong

Bachelor of Engineering (BEng), Computer Science and Software Engineering

September 2012 - June 2016

Specialization in software systems, algorithms, and distributed computing. Coursework in data structures, operating systems, computer networks, database systems, software architecture, and machine learning fundamentals. Final-year project on distributed web crawling and natural language processing for multilingual content classification.

Universidad Politécnica de Madrid

Postgraduate Course, Artificial Intelligence and Big Data

September 2021 - June 2022

Postgraduate program covering large-scale data processing, cloud-native architectures, and applied AI. Topics include distributed computing with Apache Spark, data pipeline design, deep learning for structured and unstructured data, model deployment strategies, and real-time analytics. Capstone project on multilingual NLP system for automated content classification.

Li Po Chun United World College of Hong Kong

International Baccalaureate (IB) Diploma

2010 - 2012

Two-year International Baccalaureate at UWC Hong Kong, awarded a full Rafael del Pino Foundation scholarship. Focus on sciences and mathematics within the United World Colleges movement's international education programme.

Shenzhen Institute of Information Technology

2016 - 2018

Computing and information-technology studies in Shenzhen, China. Immersed in the Shenzhen hardware and software ecosystem while studying in Mandarin.

Zhejiang University of Media and Communications

Colegio del Sur

High School Diploma

2006 - 2010

Ganador de la Beca Completa UWC, otorgada por el Rey Juan Carlos I.

Google pour les pros

Google AI Professional Certificate

August 2026 - August 2026

Seven-course professional certificate issued by Google: AI Fundamentals; brainstorming and planning; research and insights; writing and communication; content creation; data analysis; and app building. Credential ID RFQT2RK02F2E. Certificate: <https://www.coursera.org/account/accomplishments/specialization/RFQT2RK02F2E>

Stanford Online High School

AI in Healthcare Specialization

August 2026 - August 2026

Completed five-course non-degree programme issued by Stanford University. Focus: clinical data, machine learning for healthcare, AI evaluation and a healthcare capstone. Credential ID 7XCTV3Q16K04. Certificate: <https://www.coursera.org/account/accomplishments/specialization/7XCTV3Q16K04>

Microsoft Education Partner

Microsoft Generative AI Engineering Professional Certificate

August 2026 - August 2026

Completed five-course non-degree programme issued by Microsoft. Focus: Azure generative AI, foundation models, large language models, multimodal systems and responsible MLOps. Credential ID 4F55T94ZR1DH. Certificate: <https://www.coursera.org/account/accomplishments/specialization/4F55T94ZR1DH>

Microsoft

Microsoft AI & ML Engineering Professional Certificate

August 2026 - August 2026

Completed non-degree programme issued by Microsoft. Focus: AI and ML foundations, algorithms, intelligent troubleshooting agents, Azure and an advanced capstone. Credential ID G39IMP9491N8. Certificate: <https://www.coursera.org/account/accomplishments/specialization/G39IMP9491N8>

IBM Machine Learning

IBM Machine Learning Professional Certificate

August 2026 - August 2026

Completed non-degree programme issued by IBM. Focus: exploratory data analysis, supervised and unsupervised learning, deep learning, reinforcement learning and a capstone. Credential ID TRO88CF6Y826. Certificate:
<https://www.coursera.org/account/accomplishments/specialization/TRO88CF6Y826>

IBM

IBM Generative AI Engineering Professional Certificate

August 2026 - August 2026

Completed non-degree programme issued by IBM. Focus: Python AI engineering, generative models, transformers, fine-tuning, RAG, LangChain and production applications. Credential ID H21CWM4OU7XQ. Certificate:
<https://www.coursera.org/account/accomplishments/specialization/H21CWM4OU7XQ>

Google pour les pros

Google Data Analytics Professional Certificate

August 2026 - August 2026

Completed non-degree programme issued by Google. Focus: data preparation, analysis, SQL, R, Tableau, visualization and an applied case study. Credential ID WMUDGIG7OY8D. Certificate:
<https://www.coursera.org/account/accomplishments/specialization/WMUDGIG7OY8D>

Saïd Business School, University of Oxford

AI Foundations for Business Professionals Specialization

July 2026 - July 2026

Completed non-degree programme issued by Saïd Business School, University of Oxford. Focus: AI strategy, organisational adoption, business value, governance and responsible transformation. Credential ID LWTECCK71WBO. Certificate:
<https://www.coursera.org/account/accomplishments/specialization/LWTECCK71WBO>

British Standards Institution

AI Governance & ISO 42001 Readiness for GRC, Audit, & Legal Specialization

July 2026 - July 2026

Completed non-degree programme issued by British Standards Institution. Focus: AI governance, impact assessment, ISO/IEC 42001, ISO 23894, EU AI Act and trustworthy AI. Credential ID UXUS7TQ36GF4. Certificate:
<https://www.coursera.org/account/accomplishments/specialization/UXUS7TQ36GF4>

Board Infinity

Managing AI Systems: Development, Deployment, and Governance Specialization

July 2026 - July 2026

Completed non-degree programme issued by Board Infinity. Focus: RAG pipelines, LLM architecture, MLOps, LLMOps, deployment, audit, risk and governance. Credential ID HZ7XDA9WCE2I. Certificate:
<https://www.coursera.org/account/accomplishments/specialization/HZ7XDA9WCE2I>

LearnKartS

AI Automation Engineer with n8n Specialization

July 2026 - July 2026

Completed non-degree programme issued by LearnKartS. Focus: workflow automation, prompt engineering, secure APIs, RAG memory, MCP, multi-agent systems and deployment. Credential ID YUNCHF6IXQJQ. Certificate:
<https://www.coursera.org/account/accomplishments/specialization/YUNCHF6IXQJQ>

Packt

CompTIA SecAI+ (CY0-001) Certification Exam Prep Specialization

July 2026 - July 2026

Completed non-degree programme issued by Packt. Focus: AI security operations, governance, risk, threats and CompTIA SecAI+ exam preparation. Credential ID Q4IYZTSRNUITN. Certificate:
<https://www.coursera.org/account/accomplishments/specialization/Q4IYZTSRNUITN>

Board Infinity

Machine Learning Operations (MLOps) Specialization

July 2026 - July 2026

Completed non-degree programme issued by Board Infinity. Focus: production machine learning, deployment, monitoring, orchestration and MLOps lifecycle management. Credential ID 3HZCX9EHMFMO. Certificate:
<https://www.coursera.org/account/accomplishments/specialization/3HZCX9EHMFMO>

Edureka

Agentic AI Engineering Specialization

July 2026 - July 2026

Completed non-degree programme issued by Edureka. Focus: agentic AI design, autonomous workflows, multi-agent systems, RAG and tool-using LLM applications. Credential ID GZ2Q50QNLE6N. Certificate:
<https://www.coursera.org/account/accomplishments/specialization/GZ2Q50QNLE6N>

Board Infinity

Building and Deploying AI Agents with LLMs and LangChain Specialization

July 2026 - July 2026

Completed non-degree programme issued by Board Infinity. Focus: LLM agents, LangChain, retrieval-augmented generation, orchestration, evaluation and deployment. Credential ID V7QS07EJVS93. Certificate:
<https://www.coursera.org/account/accomplishments/specialization/V7QS07EJVS93>

EDHEC Business School

Investment Management with Python and Machine Learning Specialization

July 2026 - July 2026

Completed non-degree programme issued by EDHEC Business School. Focus: portfolio construction, quantitative finance, Python, machine learning and investment management. Credential ID EGOPNC45Z7X4. Certificate:
<https://www.coursera.org/account/accomplishments/specialization/EGOPNC45Z7X4>

Coursera

Data Privacy, Ethics, and Responsible AI Specialization

July 2026 - July 2026

Completed non-degree programme issued by Coursera. Focus: privacy, data ethics, bias, explainability, responsible AI and governance. Credential ID W4PPDYPHJKUR. Certificate:
<https://www.coursera.org/account/accomplishments/specialization/W4PPDYPHJKUR>

Stanford University

Specialization Certificate, Machine Learning

March 2022 - September 2022

Three-course specialization by Andrew Ng and Stanford faculty covering supervised learning (linear/logistic regression, neural networks, decision trees), advanced learning algorithms (recommender systems, reinforcement learning), and unsupervised learning (clustering, anomaly detection, dimensionality reduction). Applied projects in predictive modeling and recommendation engines using Python, NumPy, and scikit-learn.

DeepLearning.AI

Specialization Certificate, Deep Learning

January 2020 - June 2020

Five-course specialization by Andrew Ng covering neural networks, hyperparameter tuning, regularization, optimization algorithms, convolutional neural networks, sequence models, and attention mechanisms. Hands-on projects in image recognition, natural language processing, and neural machine translation using TensorFlow and Keras.

Google Cloud

Professional Certificate, Machine Learning Engineering

June 2023 - December 2023

Professional certification covering ML model development and deployment on Google Cloud Platform. Topics include feature engineering, model training and evaluation with Vertex AI, MLOps pipelines, model monitoring, and production serving at scale. Hands-on labs with BigQuery ML, TensorFlow, and Kubeflow for end-to-end ML workflows.

Honors & Awards

Two-year IB scholarship — Li Po Chun UWC Hong Kong

Issued by Fundación Rafael del Pino

Issued June 2012

Awarded the Fundación Rafael del Pino scholarship for the two-year International Baccalaureate programme at Li Po Chun United World College of Hong Kong, as recorded in the Foundation's 2012 annual report.

Adobe Certified Expert - Adobe After Effects

Issued by Adobe

Became one of the youngest Adobe Certified Experts at age 13, specializing in Adobe After Effects. Demonstrated advanced proficiency in motion graphics, visual effects, and video compositing.

Published author — ChinoTotal Mandarin course

Issued by Amazon KDP

Issued January 2024

Authored ChinoTotal, a 296-page Spanish-language beginner Mandarin course designed to take learners from zero to approximately HSK2 / A2. Independently published through Amazon KDP on 2 January 2024. ISBN 9798873249237.

Oulang.ai reached 45K clicks from Google Search in the past 28 days Apr 12. 2026

Issued by Google Search

Issued June 2026

AutoClient.ai selected by Lanzadera

Issued by Lanzadera

Issued January 2025

Selected by Lanzadera for AutoClient.ai, recognizing the product's potential as an AI-driven prospecting and lead-generation system built around discovery, enrichment, scoring, and outreach preparation.

Youth Prize — II Nogarejas Poetry Competition

Issued by II Nogarejas Poetry Competition

Issued September 2012

Awarded the €200 youth prize for “Olvidaste una llave en mi costado”, submitted under the pseudonym “El arte de la fuga”, in an international field of more than 200 works. The jury included Juan Carlos Mestre, Carmen Busmayor and Eloísa Otero. Sources: Diario de León (4 Sep 2012) and Memoria Gráfica (1953–2013), pp. 297–298.

YouTube Silver Creator Award

Issued by YouTube

Issued October 2018

Presented to Megacursos for passing 100,000 subscribers. The accompanying YouTube letter records the 100,000-subscriber milestone and identifies the recognition as a Silver Creator Award.

Publications

Apolo: Privacy-Preserving Medical Image Analysis Framework

Hugging Face · Aug 5, 2025

Apolo is a two-stage framework for medical image analysis that addresses privacy, explainability, and deployment challenges. The first stage, Apolo-VL, uses a fine-tuned Vision Language Model to generate detailed, non-diagnostic descriptions of medical images. The second stage, Apolo-Instruct, processes these descriptions to perform diagnostic classification, providing explicit reasoning steps for transparency.

<https://huggingface.co/samihalawa/APOLO-medical-multimodal-instruct>

Introducing VUDA — Visual UI Debug Agent

Hugging Face · Mar 5, 2025

VUDA is a fully automated MCP that detects and fixes common UI issues in web apps. It uses visual debugging to identify broken elements, highlight interactive zones, and modify code automatically. VUDA is open-source and can be installed using Smithery.

<https://huggingface.co/blog/samihalawa/visual-ui-debug-agent>

ChinoTotal — Aprende Chino Mandarín desde 0 (HSK2 / A2)

Amazon Digital Services LLC / KDP · Jan 2, 2024

Spanish-language beginner Mandarin course published independently through Amazon KDP. 296 pages; designed to take a learner from zero to approximately HSK2 / A2. Published 2 January 2024. ISBN 9798873249237.

The Complete Gemini 3.1 Pro Developer Guide for Autonomous Coding Agents

LinkedIn Article

Technical publication on autonomous coding agents, focused on how modern AI systems move beyond simple prompting into reusable engineering workflows. Covers agent architecture, context handling, execution loops, and the practical difference between demos and operational AI systems.

EU AI Act Transparency Engineering Checklist — Article 50

LinkedIn Article · Applied AI Systems · Aug 8, 2026

Engineering checklist for implementing EU AI Act Article 50 transparency across chatbots, AI-generated content and deepfakes. Covers disclosure timing, system touchpoints, evidence, human review and operational ownership, with a link to the RapidAct implementation resource.

<https://www.linkedin.com/pulse/eu-ai-act-transparency-engineering-checklist-article-50-sami-halawa-et9oe>

Projects

Practical AI Tutoring, Curriculum Design and Implementation

July 2022 - July 2025

Designed and delivered practical AI, programming and automation training for professionals, institutions, families and advanced students. Built hands-on curricula around generative AI, AI agents, prompt engineering, Python/data workflows, no-code automation, technical project building and implementation-focused tutoring. The goal is to turn learning into usable systems: websites, dashboards, internal tools, scraping/data pipelines, lead-generation workflows, AI-assisted study systems and educational software. Skills: AI instruction, curriculum design, generative AI, AI agents, prompt engineering, Python, data workflows, automation and educational software.

Curso de Agentes AI Autónomos

2025 - 2026

Built and structured an implementation-first AI agents program focused on designing, building, and deploying autonomous AI workflows for real business use. Covers browser automation, no-code orchestration with n8n, prompt and agent architecture, production-ready workflows, and 24/7 autonomous systems that turn AI into reusable operational tools rather than demos.

Programmatic SEO and Growth Systems

July 2016 - July 2023

Worked across 70+ SEO and growth projects involving technical SEO, search intent, content systems, analytics, conversion optimization and programmatic discovery pages. Skills: SEO, analytics, content systems, technical SEO, growth automation, marketplace search, conversion optimization and web development.

AutoMedical Academy — Healthcare AI Learning & Workflow Prototypes

February 2025 - July 2025

Built educational and product work around medical-data workflows, multimodal review, structured reporting, human-reviewed outputs and healthcare-oriented product design. Connected research, technical instruction and practical tool development for professional learning contexts.

AutoAccount.ai

2025 - 2025

Built AutoAccount.ai as an AI-native accounting software concept and delivery project for AEContables, focused on simplifying accounting workflows, admin-heavy operations, data handling and business process automation through product design and implementation.

Huatong — Chinese-first European Community Platform

2026

Built a Chinese-first jobs, housing, classifieds and services platform for Chinese communities across Europe. Work spans product architecture, multilingual delivery, shared marketplace infrastructure and deployment.

IWAKY / AutoPricing — Pricing Intelligence & Decision Reports

October 2025 - 2026

Built marketplace-pricing intelligence, data collection, product matching, quote analysis and decision-reporting workflows under a signed €35,000 B2B scope.

OUPIN — AI-Assisted Commerce & Discovery

2026

Built a Chinese-language AI commerce and discovery product using shared marketplace identity, actor/storage infrastructure and deploy workflows.

GOWA WhatsApp API / WhatsApp MCP

2025 - 2026

Built and operated WhatsApp history, messaging and agent-integration tooling around GOWA and MCP workflows.

SMTP / IMAP MCP — Email Infrastructure for Agents

2025 - 2025

Published and maintained email integration tooling for agents across SMTP and IMAP workflows. The public SMTP MCP repository had 17 stars and 15 forks.

Google Jules MCP — Coding-Agent Workflow Bridge

2025 - 2025

Built an MCP bridge for integrating Google Jules with coding-agent workflows.

Telnyx Agentic Voice & Telephony Tooling

2026 - 2026

Built voice and telephony integrations for agent workflows using Telnyx-oriented tooling, call orchestration, quality controls and structured operational handover.

Codex Chronicle & Screenpipe Memory Tooling

2026

Built persistent visual-memory and conversation-recovery tooling across Codex, Screenpipe and adjacent agent environments for continuity across long-running technical work.

INTLAW AI Legal Workflow

October 2025 - June 2026

Built an AI-assisted legal-workflow platform in collaboration with INTLAW / Ignacio, covering document analysis, structured questionnaires, research support, and workflow automation.

Tasky

2026 - 2026

Built Tasky, a SwiftUI Google Tasks client for macOS, iOS and iPadOS. Work covered native task workflows, platform integration, and release preparation.

Notion–Drive Sync

2026 - 2026

Built a bidirectional Notion–Google Drive synchronization and mirroring tool to keep workspace content and files aligned across both systems.

InfoHuaxin

2025

Built and operated InfoHuaxin, a Chinese-language information and classifieds platform for a paid client, covering the customer-facing product, data integrations and operational tooling.

Umbramed Clinical-Study Tooling

July 2025 - June 2026

Served as technical lead for Umbramed and Valerio clinical-study tooling, designing and building software workflows for research operations and structured medical data.

SORT / SortBot

January 2025 - February 2025

Built SORT and SortBot as a repository-backed product and automation proposal, including product design, workflow systems, and implementation artifacts.

Scope Account Intelligence

July 2025 - July 2025

Built and demonstrated Scope, an account-intelligence system for researching organizations, structuring prospect context, and supporting sales workflows.

San Martín AI / Software Proposal

October 2025 - October 2025

Prepared the San Martín AI and software proposal, including requirements analysis, product concept, architecture, and delivery planning.

Recipe Intelligence Platform — Discovery & Design

July 2026 - July 2026

Ran product discovery and designed a recipe-intelligence platform from the 8 July 2026 Meet workshop: digitize messy chef notes and photos, enrich and cross-check recipes, generate structured chef-ready outputs, support multilingual publishing, and optionally create recipe media.

SONMADE — Media Processing Automation

2026 - 2026

Built SONMADE, a React and TypeScript media-processing platform using FFmpeg and Sharp for automated creative and content workflows.

PIME EU AI Act Literacy Pack

July 2026

Designed the PIME EU AI Act literacy pack, a €399 packaged offer with supporting content and campaign infrastructure.

Product & Prototype Portfolio — AI, Health, Commerce & Media

2024

Portfolio of products spanning AI tools, healthcare workflows, commerce, education and media: ClipKing, UseraLegal, Aida Facturas, IRSushi, AutoCrypto, AutoIOL, AutoRad, KittyTasks, FocusOnTask, Sharedetect, ZebraMenu, Lemon AI, the OULANG World Cup module, EA Housing / Radio Inter, Chinese Soundscapes and a poetry-audio archive. Built across product discovery, UX, automation, web/mobile delivery and technical delivery.

Brevo MCP Server — AI Marketing & CRM Automation

June 2025

Built and open-sourced a TypeScript/Node.js MCP server that gives AI agents practical access to Brevo contacts, campaigns, transactional email, CRM deals and tasks, webhooks, conversations and ecommerce workflows through the official Brevo SDK. Released in June 2025. Skywork published “Brevo MCP Server by Sami Halawa: An AI Engineer’s Deep Dive” in October 2025, and the server is independently catalogued in the MCP ecosystem. Technical article: <https://skywork.ai/skypage/en/brevo-mcp-server-ai-engineer/1977914198073462784>

OULANG — Chinese Diaspora Super-App for Europe (oulang.ai)

January 2026

Founder and product/engineering lead for a multilingual marketplace and local-life platform spanning housing, jobs, services, community publishing and AI-assisted discovery across web, iOS and Android. Delivered product architecture, store workflows, analytics and infrastructure. By 3 July 2026, OULANG had recorded 17,262 registered users, 38,857 listings and 89,913 contact reveals.

AutoClient AI — Autonomous Outreach & CRM Automation

March 2024 - July 2025

Founder-led agentic revenue-operations system for account research, enrichment, qualification, CRM work and coordinated email, LinkedIn, WhatsApp and voice follow-up. Built modular workers, shared account context, API integrations, automated post-call notes and next-action workflows. Two public AutoClient product tutorials are available on the owned YouTube channel.

APOLO — Medical Multimodal Vision-Language Model (glaucoma)

April 2025 - December 2025

Developed a DeepSeek-based image-to-text research model for glaucoma-related image review. Work included dataset preparation, fine-tuning, evaluation and specialist human review, with the model published on Hugging Face as samihalawa/APOLO-medical-multimodal-instruct.

VUDA — Visual UI Debug Agent (open-source MCP tool)

May 2025

Open-source MCP server that gives AI agents computer-vision-based UI debugging: annotated screenshots, element detection and automated visual verification loops. Used in agentic development workflows. github.com/samihalawa/visual-ui-debug-agent-mcp

AutoDate.ai — Consumer iOS App (Expo, TestFlight)

December 2025 - July 2026

Consumer dating-automation product built with Expo/React Native for iOS and web, shipped through TestFlight. Session tooling, automation workflows and full App Store release pipeline (Fastlane, RevenueCat). autodate.ai

ChinoTotal — Published Mandarin Course & Learning Platform

January 2024 - July 2026

Author of "ChinoTotal: Aprende Chino Mandarín desde 0" (296 pages, ISBN 9798873249237) plus chinototal.com: interactive curriculum from zero to HSK2/A2, onomatopoeia decks, 72-poem web collection and AI-generated poetry audio. Built end to end: content, web platform and audio pipeline.

PIME.ai — AI Services Studio & EU AI Act Readiness Pack

July 2025

Product studio for practical agentic systems, AI training and EU AI Act readiness for SMEs. Built multilingual service journeys and technical readiness material through Agents AI Ltd, a UK-registered company.

RapidAct.eu — EU AI Act Transparency Engineering

January 2026

Built practical Article 50 implementation tooling for AI transparency: public-page scanning, AI-system inventory, disclosure classification, placement guidance, evidence capture and prioritised action plans. Combined EU AI Act literacy with hands-on product, web and automation delivery. rapidact.eu

Test Scores

Curso de Megacursos

Score: 100

Chinese C2 (HSK6)

Score: 100 · April 2021

AI Governance & ISO 42001 Readiness for GRC, Audit, & Legal (BSI / Coursera Specialization)

Score: 100% · July 2026

BSI specialization delivered via Coursera. Five courses: ISO/IEC 22989:2023 - An Introduction to the Fundamentals of AI; AI System Impact Assessment Guidance; AI Management Essentials - Integrating ISO 42001 & ISO 23894; Understanding the Foundations of the EU AI Act; Approaches to Establish Trust in AI Systems. Completed July 2026. Credential ID UXUS7TQ36GF4. Verify: coursera.org/verify/specialization/UXUS7TQ36GF4

Recommendations

Haoyung Zu — Rental Manager, Profesional independiente

August 10, 2026 — Haoyung managed Sami directly

我曾直接负责 Sami 的工作，他给我留下了很深的印象。他是一名非常出色的 Full-Stack Product Engineer，技术能力扎实，尤其擅长 AI、产品开发以及把复杂的想法快速落地成实际功能。Sami 学习能力很强，做事主动、有责任心，也很善于解决问题。他不仅能够独立完成技术工作，还能很好地理解产品需求，并把 AI、Computer Vision 等技术真正应用到产品中。他也是一位很好的沟通者，能够把复杂的技术概念讲得清楚。无论是 AI、CV 还是全栈产品开发，我都很愿意推荐 Sami，他会是一个非常可靠、有创造力的团队成员。

Hugo Morales — Investment Associate, Lukkap Ventures

July 27, 2026 — Hugo managed Sami directly

Gran capacidad técnica, mentalidad analítica y una ejecución impecable en desarrollo y datos.

Haoyung Zu — Rental Manager, Profesional independiente

July 15, 2025 — Haoyung was Sami's mentor

Recomiendo con confianza a **Sami Halawa**, CEO de AutoClient.AI. Como su asesora estratégica para el mercado chino, mi rol fue de asesoramiento en la validación del Producto Mínimo Viable (MVP) de AutoClient.AI, una plataforma de automatización de ventas B2B impulsada por IA. La validación se centró en **empresarios chinos residentes en España**, un grupo elegido por su **pragmatismo y apertura a nuevas tecnologías** como la Inteligencia Artificial, siendo considerados buenos **early adopters**. Mediante esta colaboración, se obtuvo un resultado concreto: la plataforma generó **más de 200 contactos cualificados en solo dos semanas** para uno de estos empresarios, lo que contribuyó a una **mejora del 30% en su tasa de conversión de ventas**. Este caso inicial demostró el valor real y la alta precisión de AutoClient.AI, incluso atrayendo capital adicional de inversores. El liderazgo técnico y la visión de producto de Sami fueron fundamentales en estos logros.
