Founder-engineer who turns ambiguous ideas into operating AI products. I work across the full system—product definition, LLM and agent workflows, data and APIs, web and mobile delivery, infrastructure, observability, growth and customer operations. My strongest work sits where technical architecture, rapid product execution, multilingual communication and commercial reality meet.

PROFESSIONAL EXPERIENCE

Founder & AI Product Engineer · [Agents AI Ltd](#) Jul 2025–Present
Madrid / London · Company no. 16570822 · AI products, platforms and specialist delivery

- Own product discovery, architecture, implementation, deployment, analytics, monetisation and operational handover across founder-led and B2B systems.
- Built **OULANG (欧浪AI)** across web, iOS and Android: **17,262 users, 38,857 listings and 89,913 contact reveals** by 3 July 2026, with multilingual workflows, search, payments and product analytics.
- Extended the marketplace architecture into **Huatong** for Chinese communities across Europe and **OUPIN** for AI-assisted commerce/discovery.
- Built **AutoClient** and related research, enrichment, CRM, email, WhatsApp and voice-agent systems; published reusable MCP and developer tooling.
- Delivered pricing-intelligence/evidence-report workflows and prototyped multimodal medical-image review and reporting tools, keeping evaluation and human review explicit.

AI Instructor & Independent Technical Consultant 2022–Present

- Teach practical AI, agents, MCP, automation, Python and product engineering through working applications, live builds and implementation-focused curricula.
- Translate business needs into systems for professionals and teams; the current archive contains **97 valid lesson, meeting and project recordings (110.83 hours)**.

Senior Full-Stack Engineer · [Damehosting](#) 2019–2023

- Developed and maintained production web systems; supported delivery through code review, CI/CD practices, Linux/server operations and developer mentoring.

Web, Mobile, Growth & Education · [Megawebs](#) / [Megacursos](#) 2009–2023

- Built web/mobile products, produced technical courses, taught digital design and led SEO/acquisition work across a self-reported 70+ project history—the distribution and communication foundation now applied to AI products.
