

AI PRODUCT · ENGINEERING · OPERATIONS

Sami Halawa Ribas

Voice AI · API Integration & Automation Engineer

Madrid, Spain · EU work authorisation · +34 679 794 037 · sami@oulang.ai ·
samihalawa.com · linkedin.com/in/samihalawa · github.com/samihalawa

Integration-focused AI engineer connecting voice, messaging, email, CRM and web systems into reliable agent workflows. Builds the APIs, state, tools, automation and operational handover around customer-facing AI.

ROLE EMPHASIS

Voice & communications

Voice-agent state, telephony integrations, email, WhatsApp, messaging and conversation workflows

Automation

n8n, MCP, tool/function calling, research/enrichment, CRM/ERP integration and background jobs

APIs & backend

Python, FastAPI, TypeScript, Node.js, REST APIs, SQL, webhooks and structured outputs

Operations

Docker, Linux, CI/CD, deployment, logs, monitoring, analytics, retries and human handoff

CURRENT PROFESSIONAL EXPERIENCE

Founder & AI Product Engineer · Agents AI Ltd

Jul 2025–Present · Madrid / London

- Own product discovery, architecture, implementation, deployment, analytics, monetisation and operational handover across founder-led and B2B systems.
- Built OULANG, a multilingual marketplace and local-life platform for Chinese communities in Spain, across web, iOS and Android delivery.
- Built AutoClient and research, enrichment, CRM, email, WhatsApp and voice-agent systems; published reusable MCP and developer tooling.
- Delivered pricing-intelligence, decision-reporting, document-processing and multimodal review workflows with human review built into the process.

AI Instructor & Independent Technical Consultant

2022–Present · Madrid / Remote

- Teach practical AI, agents, MCP, automation, Python and product engineering through working applications, live builds and implementation-focused curricula.
- Translate business needs into systems and technical decisions for professionals and teams in Spanish, English and Mandarin.

Technology → application → proof

Technologies are stated explicitly and tied to systems where they were applied. Databricks Mosaic AI is presented as current certified applied training completed deliberately for role readiness.

Agentic AI & orchestration

MCP; tool/function calling; multi-agent collaboration; memory; structured outputs; model routing; prompt and evaluation loops; LangGraph-informed architecture

Evidence:

AutoClient, communications agents, VUDA, SMTP MCP, WhatsApp/GOWA and agent-course implementations

Retrieval, documents & multimodal AI

RAG; OCR; document ingestion; chunking/retrieval workflows; image-text review; computer vision; human-review checkpoints

Evidence:

SORT course digitisation, AutoMedical, APOLO, AutoIOL/OCT workflows, reporting and recipe-intelligence prototypes

Models & AI platforms

OpenAI; Anthropic; Gemini; DeepSeek; Hugging Face; open-source models; Databricks Mosaic AI certified applied coursework

Evidence:

Production integrations and prototypes across product, automation, education and multimodal workflows; Mosaic training completed deliberately for current role readiness

Backend & APIs

Python; FastAPI; TypeScript; Node.js; REST APIs; webhooks; SQL/MySQL; background jobs; authentication; integrations

Evidence:

AutoClient, marketplace services, communications tools, pricing intelligence, client workflows and product APIs

Web, mobile & interface delivery

React; Next.js; Tailwind CSS; Expo/React Native; SwiftUI; Ionic; Capacitor; responsive web; native/store delivery

Evidence:

OULANG, Huatong, OUPIN, AutoDate, Tasky, Umbramed and more than 70 earlier web/mobile builds

Automation & communications

n8n; MCP; email/SMTP; WhatsApp; Telnyx; voice-agent state; CRM/ERP integration; Apify; Crawlai; data enrichment

Evidence:

AutoClient, Tekçe property leads, GOWA, SMTP MCP, voice tooling, outreach and operational automations

Cloud, delivery & operations

Docker; Linux; CI/CD; Cloudflare; Coolify; Hetzner; AWS/Azure/GCP exposure; deployment; logs; monitoring; cost control

Evidence:

Operating production web/mobile systems, shared platform infrastructure, self-hosted services and client handover

Data, analytics & commercial systems

SQL; product analytics; PostHog; GA4/GTM; Stripe; RevenueCat; payments; pricing/history data; reporting; experimentation

Evidence:

OULANG monetisation and analytics, IWAKY/AutoPricing, marketplace intelligence, mobile subscriptions and campaign measurement

Media, education & technical communication

FFmpeg; Sharp; After Effects; course design; live builds; technical writing; Spanish/English/Mandarin delivery

Evidence:

SONMADE, 373-video public catalogue, ChinoTotal, AI instruction and 111 verified work-media files

Core systems: architecture and implementation

Project-level mapping of stack, responsibility and operating outcome—so the work does not need to be inferred.

OULANG / Huatong / OUPIN

TypeScript, React/Next.js, Expo/mobile delivery, SQL, payments, analytics, Cloudflare and containerised deployment.

Designed and operated shared marketplace capabilities across identity, listings, search, messaging, monetisation, multilingual delivery and web/native release workflows.

AutoClient & communication agents

Python/FastAPI, TypeScript/Node.js, MCP, model APIs, structured outputs, CRM, email, WhatsApp, Telnyx/voice, webhooks and background jobs.

Built research, enrichment, scoring, personalised outreach, conversation-state and human-handoff workflows across multiple channels.

IWAKY / AutoPricing

Marketplace data collection, Apify/Crawlab-style actors, product matching, price history, WhatsApp quote analysis, SQL/ERP inputs, dashboards and PDF reporting.

Implemented pricing-intelligence and decision-reporting workflows under a signed scope while keeping acceptance and payment state distinct.

VUDA & MCP toolchain

TypeScript/Python, MCP, browser/UI evidence, image capture and annotation, SMTP, shell/browser/diff integrations.

Published reusable developer tools; VUDA reached 80 stars/7 forks and SMTP MCP reached 17 stars/15 forks at the verified snapshot.

AutoMedical / APOLO / ophthalmology

Python, multimodal model workflows, image-text processing, OCR/computer vision, structured reporting and human review.

Prototyped medical-learning and image-review workflows without claiming clinical validation, diagnosis or production hospital deployment.

Full-stack, mobile, governance and media systems

The profile spans several conventional roles: AI/agent engineering, full-stack product delivery, platform operations, automation and technical instruction.

Tasky / AutoDate / Umbramed

SwiftUI, Expo/React Native, Ionic/Capacitor, React/TypeScript, authentication, sync, payments and release tooling.

Delivered or advanced native/cross-platform products through TestFlight, store-facing, pre-release and client-delivery states.

SORT & document intelligence

PDF/OCR ingestion, structured extraction, RAG/chat interfaces, web publishing, APIs and background processing.

Designed a workflow to turn course PDFs and unstructured source material into searchable, structured online learning experiences.

PIME.ai / governance / instruction

EU AI Act applicability and literacy workflows, ISO 42001/23894 concepts, impact assessment, RAG/agent architecture and multilingual curricula.

Combined implementation-first instruction with working governance products and current professional education in responsible AI and operational controls.

SONMADE & media systems

React/TypeScript, FFmpeg and Sharp; motion, colour, edge/text and fullscreen scoring.

Built a scene-analysis and highlight-extraction prototype as part of a broader audio, transcription, video and creative-technology archive.

Damehosting / Megawebs / Megacursos foundation

Production web systems, Linux/server operations, CI/CD, code review, web/mobile delivery, SEO/acquisition and Adobe creative tooling.

Built the engineering, operations, teaching and customer-delivery foundation behind later end-to-end AI product ownership.

Engineering, product, operations and teaching

The complete career foundation is preserved in every role edition; the opening changes, not the factual history.

Founder & AI Product Engineer · Agents AI Ltd	Jul 2025–Present · Madrid / London
• Own product discovery, architecture, implementation, deployment, analytics, monetisation and operational handover across founder-led and B2B systems. • Built OULANG, a multilingual marketplace and local-life platform for Chinese communities in Spain, across web, iOS and Android delivery. • Built AutoClient and research, enrichment, CRM, email, WhatsApp and voice-agent systems; published reusable MCP and developer tooling. • Delivered pricing-intelligence, decision-reporting, document-processing and multimodal review workflows with human review built into the process.	
AI Instructor & Independent Technical Consultant	2022–Present · Madrid / Remote
• Teach practical AI, agents, MCP, automation, Python and product engineering through working applications, live builds and implementation-focused curricula. • Translate business needs into systems and technical decisions for professionals and teams in Spanish, English and Mandarin.	
Senior Full-Stack Engineer · Damehosting	2019–2023
• Developed and maintained production web systems; supported delivery through code review, CI/CD, Linux/server operations and mentoring.	
Web, Mobile, Growth & Education · Megawebs / Megacursos	2009–2023
• Built more than 70 web and mobile projects, produced technical courses, taught digital design and led SEO/acquisition work.	

ADDITIONAL PROFESSIONAL CHRONOLOGY

- Independent web and mobile product builder · 2015–Present · more than 20 native and cross-platform applications across independent product work.
- Presenter and live host · China · 2015–2017 · multilingual on-camera communication, live presentation and content production.
- Commercial model and actor · China · 2013–2017 · international production, client communication and visual storytelling.
- Digital design and technology instructor · 2009–2019 · After Effects, Photoshop, Cinema 4D, web and product skills.

PUBLIC ENGINEERING EVIDENCE

90 evidence-classified projects	249 public original repositories	12 Hugging Face articles	125.83h verified work-media archive
---	--	------------------------------------	---

Projects 1–23 of 90

Every evidence-classified entry is retained in every edition. The detailed case studies on earlier pages explain the core technology and delivery work.

1. RealSintra early public original repository, created in 2023: GitHub.	13. Audio and transcription tooling multiple local/public tools and later Screenpipe/meeting workflows verify continuing speech, audio and transcription engineering.
2. Mi ChatGPT React Español Spanish React interface/experiment: GitHub.	14. KittyTasks / FocusOnTask productivity-app artifacts in the local/public repository census.
3. OpenAI/GPT files and experiments archivosopenedgptc is a verified 2023 public original: GitHub.	15. AutoClient seed work first-year repositories and local roots establish the early automated client-acquisition/product direction.
4. DameSender continuity the public repository predates 2023 and is the earliest observed public original: GitHub.	16. InfiniteStorageFace / Pollinations experiments repository artifacts around generative interfaces/storage.
5. Aprende IA / IA Megacursos local repositories, course artifacts and the wider Megacursos lineage verify substantial AI-education work.	17. AutoVideo, MedSAM and AutoTraining exploration local/public artifact families connecting generative video, segmentation and training workflows.
6. MenuEditorElectron public desktop-software repository in the 2024 wave.	18. AutoIOL ophthalmology-oriented artifact family in repositories and medical project history.
7. AI Absolut and prompt research public GitHub/Hugging Face collection evidence supports prompt/system experimentation.	19. SpeakingAI public/local project artifact in speech/AI.
8. Email crawler and lead tooling public/local repository artifacts establish crawling and email automation work.	20. AutoClient monorepo and worker expansion repository evidence shows the product growing into automation/workers.
9. macOS Optimizer public open-source utility with 13 stars and 1 fork at the audit snapshot.	21. EyeUnit / Fernando Ly paid relationship begins Notion cashflow contains 15 “Ly Yang Fernando” payments totalling €32,200.28 from 1 Oct 2024 to 11 Jun 2025.
10. CloudflaredMe public repository/tooling artifact.	22. Daniel Parisi engagement one €250 cashflow row dated 2 Oct 2024.
11. Rafael Botella work the cashflow database contains 5 labelled payments totalling €14,270 from 19 Feb 2024 to 23 May 2025.	23. Light Funnels work two cashflow rows total €2,300 in Oct 2024.
12. AutoCrypto local and public artifact family establishes a crypto automation/product exploration lane.	

Projects 24–46 of 90

Every evidence-classified entry is retained in every edition. The detailed case studies on earlier pages explain the core technology and delivery work.

24. Hugging Face technical writing begins/continues

the public profile exposes 12 currently enumerated articles across the broader archive.

25. Colab research archive

at least 112 direct folder rows were observed, with at least 58 meaningfully named notebooks.

26. SORT / SortBot

sortbot was created 6 Feb 2025.

27. AutoHSK and language-learning tools

project artifacts connect Chinese-learning expertise to AI-assisted study tools.

28. Blog and content system work

public/site repositories and later personal-site code verify ongoing technical publishing.

29. SMTP MCP Server

public repository with 17 stars and 15 forks at snapshot.

30. Shell, browser and diff MCP tools

repositories include command/browser/editor integrations.

31. Ophthalmology workflows

repositories, Drive/Gmail and later Scope/OCTbot evidence verify continuing ophthalmic AI/product work.

32. Hugging Face articles

12 current public articles are enumerated with dates and links in the HF appendix.

33. APOLO medical multimodal artifact

samihalawa/APOLO-medical-multimodal-instruct, created 17 Apr 2025, is the one model returned by the current HF API, with task image-text-to-text.

34. VUDA

public GitHub repository with 80 stars and 7 forks at snapshot, the strongest observed public-original repository by stars.

35. AutoTutorial, MentorIA and PerfectPrompter

project families for guided learning/prompting.

36. Wordlist Visual engagement

8 cashflow rows total €24,800 from 12 Feb to 5 Jun 2025.

37. Scope / account intelligence prototype

3 Jul Gmail message shares scope.pime.ai and describes merging lists, finding cross-sell opportunities and scoring accounts using product mix/clinical-market metrics; David Blackwell responded positively.

38. Fernando Ly medical-AI teaching/research

an OCTbot email dated 10 Jun and the Scope thread verify applied medical/OCT and commercial-intelligence collaboration.

39. AutoClient expands

repositories, Drive back-office/kickoff/deck materials and later Lanzadera evidence show the product becoming a larger client-acquisition automation platform.

40. MCP/open-source wave

public repositories for SMTP, browser, shell, diff and related agent tools establish a concentrated integration-tooling period.

41. Agents AI Ltd

agentsai.ltd currently returns an expected company surface, and the signed IWAKY contract later identifies Agents AI Ltd no.

42. Lanzadera ecosystem participation

1 Sep 2025 email from Patricia Cháfer, Business Developer at Lanzadera, provides AWS Activate codes and references "startups de Lanzadera." Safe copy: AutoClient participated in Lanzadera's startup/perk ecosystem in 2025.

43. APOLO / AutoMedical packaging

repositories and current automedical.ai live surface verify medical-AI product packaging.

44. Agent tools and operating utilities

continued public/local releases cover automation, memory, browser, deployment and developer workflow.

45. AutoRad

the direct Notion project page labels the project "Backlog." Funding targets, "30–50%," GDPR readiness and "5 patents" appear in plans/summaries, not verified outcomes.

46. Personal and company site work

repository and live-domain evidence verifies continued identity, portfolio and company-site engineering.

Projects 47–69 of 90

Every evidence-classified entry is retained in every edition. The detailed case studies on earlier pages explain the core technology and delivery work.

47. WhatsApp MCP / automation

whatsapp-go and related GOWA/MCP artifacts verify substantial WhatsApp integration work.

48. IWAKY / AutoPricing signed scope

a signed contract dated 7 Oct 2025 and labelled signed 10 Oct identifies IWAKY Servicio Técnico S.L.

49. INTLAW / Ignacio legal AI

Notion hub, intlawn-demo, slideshow/video repositories and public HF Space verify a legal-AI demonstration spanning prospecting, intake via chatbot/WhatsApp/phone and multi-agent case-file analysis.

50. San Martín HR automation proposal

direct Notion proposal and a 15 Oct 2025 Gmail from Miguel asking for budgets with an Excel attachment verify work on birthday automation, timesheets/work-part rules, talent search and an employee portal.

51. Umbramed / Valerio

direct design documentation identifies an Ionic/Capacitor study/clinical-tools application with Dr.

52. AutoTinder / AutoDate design generation

Notion design/architecture pages and repositories verify extensive product design and automation work.

53. Prototype portfolio wave

public/local artifacts include AutoProposal, AuraAI, HealthGuard, MessageFlow, PricelIntel, MiniMax calculators, Manus experiments, AutoMedical Academy, ReinforcementAnalysis, Detectar AI, EnvMem, WindBack, SonidoVivo, AutoGeolocation, AutoReplyKitty,...

54. Sami Halawa poetry website

the repository README and data source verify a collection of 72 original poems written 2017–2022, with a Netlify-oriented web application and complete poem navigation/export work.

55. Lemon AI deployment/customization work

a Nov 2025 local repository records deployment, landing-page, identity and infrastructure changes around the upstream open-source Lemon AI agent platform.

56. 15-hour AI-agents course

the direct Notion course “Arquitectura y Desarrollo de Agentes de IA” specifies 15 hours across foundations, tools, memory, multi-agent systems, RAG, deployment and observability.

57. OULANG becomes the central production platform

repositories, Linear project/issues, app/store artifacts, oulang.ai, oulang.app and public OULANG store listings verify a Chinese-diaspora classifieds/local-life platform spanning housing, jobs, second-hand, business services and community content in Spain.

58. OULANG metrics and commercial claims

analytics, RevenueCat, Stripe and store surfaces exist, but any user, GMV, revenue, listing or conversion metric must be read directly from the current provider and timestamped before publication.

59. Umbramed continuation

2026 repository, site, application materials and sampled Meet sidecars verify continued technical work, web/PWA recovery advice, exam-data organization, Claude/Table connector exam-upload workflow support, Stripe/payment-integration preparation and...

60. Skills and tooling publishing

the public repository wave includes agent skills, browser/desktop workflow utilities and reusable MCP infrastructure.

61. GOWA

WhatsApp automation/API work is supported by public/local repositories, current tracker history and related integration work.

62. Notion–Drive synchronization

public repository with 3 stars at snapshot and direct Notion/Drive mirror evidence.

63. OULANG web, iOS, Android and monetization work

repo/store/provider evidence supports active web and native development, payments/membership, SEO, analytics and product operations.

64. Huatong

huatong.eu, repositories and Linear evidence verify a multilingual employment/platform lane tied to Chinese users and European markets.

65. InfoHuaxin

infohuaxin.es, cashflow rows labelled Infohuaxin (€12,400 across 8 rows, 3 Sep–13 Nov 2025) and repositories verify a connected client/product lane.

66. OUPIN

repositories and Linear issues verify a multilingual consumer/property-style platform lane with shared identity/infrastructure work.

67. Crawlal / Apify actor fleet

repositories and current infrastructure work verify scraping actors, a central store and downstream consumers across OULANG/Huatong/OUPIN.

68. Codex Chronicle and Screenpipe workflows

local skills, memory tooling and current Screenpipe database verify evidence-first cross-session reconstruction.

69. Telnyx voice/communications tools

telnyx-mcp-server and related toolkits verify communications integration work.

Projects 70–90 of 90

Every evidence-classified entry is retained in every edition. The detailed case studies on earlier pages explain the core technology and delivery work.

70. Desktop Commander and operations skills

numerous local/public skills establish Mac/browser/CRM/deployment workflow automation.

71. MadridResorts

project/repository lane from the local/public inventory.

72. VibraCode

vibracode.megawebs.com currently renders the expected surface.

73. AutoMedical live surface

automedical.ai currently renders an expected product page.

74. Personal/company/publishing surfaces

samihalawa.com, pime.ai, agentsai.ltd and chinototal.com currently return expected pages.

75. Tasky

source code and commit history verify a native SwiftUI Google Tasks client for macOS plus iOS/iPadOS targets, with menu-bar quick capture/focus, widgets, share extensions, search and Google Tasks sync.

76. AI tutoring, ITE and TusClases operations

the PROJECTSAITUTORING source ledger verifies inbound teacher recruitment from Instituto Tecnológico Europeo, technical-course examples, a live rate negotiation and proposals covering generative AI, automation, agents, n8n and multimodal content.

77. OULANG World Cup / sports-live module

Expo source contains /mundial prediction/leaderboard flow, sports lists, standings, recent results and live-room/source routes, plus an explicit handoff to a separate betting host.

78. SONMADE content factory

a local React/TypeScript prototype implements FFmpeg/Sharp-based scene analysis and highlight extraction from video, including motion, color, edge/text and fullscreen scoring.

79. AutoDate web and TestFlight

autodate.ai currently renders.

80. Recipe intelligence platform with José Olivares

the 8 Jul Meet recording and Google Doc sidecar 15bDt21Xp4UPz2EQ72LKyj8oYFSZ65LZsyVVutAtWel verify a product-discovery/design session: upload/scan messy chef notes and photos, extract structured recipes, enrich them through internet/video research, preserve...

81. Tekçe / OULANG-AutoClient property lead-generation discussion

the 15 Jul 2026 Meet recording and English Google Doc sidecar 1RJg4t6vWIQcJsfnqWO1vhMLrrquZpCHmvkGPXQfmk0 verify a business-development meeting with Natalia Rudnicka and Özkan Tekçe around Chinese property-buyer lead generation, success-fee versus...

82. OULANG Expo/native parity work

active repository, app-store workflows and recent session evidence verify continued native parity, marketplace, payment and store work.

83. EA Housing / Radio Inter proposal package

a current proposal repository contains modular, separate-company proposals and a group option, explicitly constrained by the recorded call.

84. Chinese soundscapes, tutoring materials, lessons and poetry audio

local primary artifacts include ChineseSoundscapes.pdf, a 12-slide Chinese onomatopoeia deck, printable exercises, school-vocabulary cards, bilingual tutoring/proposal material, and generated Spanish poetry audio/manifests.

85. PIME.ai EU AI Act compliance pack

source and live-site code verify a multilingual €399 fixed-price pack covering applicability/risk analysis, AI-literacy training and a compliance roadmap, with dedicated /ai-act SEO/schema work and an outreach sequence recorded in the repo ledger.

86. Additional 2026 private/local product artifacts

the filesystem and session sweep verify named roots for ClipKing (Expo), UseraLegal, Aida Facturas and IRSushi, along with certificate/app-store and backup/utility workspaces.

87. EVA AI/admin automation training consultation

the 11 Nov 2025 Meet recording and Google Doc sidecar 118iouqm4QBhLDTZQo7cRkrjDIUWsQQPald76YaAKMTI verify a training/proposal consultation around Copilot/prompting, browser-click automation, local file/accounting organization, Microsoft To Do/task workflow...

88. Mike Lepcsik lead-generation/business-automation consulting

the 12 Nov 2025 Meet recording and Google Doc sidecar 11RkyF-slt8jOBI8ZOxw7DpM8tiHpvLnnsCTyANAO verify consulting around an N8N flow, Close CRM read/write, Lead Feeder credential/API issue, Google Maps/Search enrichment, agent/MCP architecture...

89. SOLMADE fashion AI/marketing proposal discovery

the 9 Jan 2026 Meet recordings and Google Doc sidecars 1xoA1X7onZvLlfSEhXQBpGKDDMM1zTqN8t3QXh7g5w58 and 1NukWx1t3LSz67ac4g9lU6pg84KGM-Aeo6v-s3ghjGFY verify fashion/commerce proposal discovery around AI-driven branding, website/app rebuild, SEO/blog automation,...

90. Career evidence rebuild

this current audit reconciles the full authenticated 1,735-repository GitHub owner inventory, 749 local Git roots, Notion, Gmail, Drive/Colab, Hugging Face, Linear, Screenpipe, recording files, CV sources and the personal site.

Formal learning and verified qualifications

Every currently publishable qualification is retained. Historical badges without present certificate evidence remain excluded.

AI, governance, automation and quantitative learning

Course-level detail is included so specific technical and governance training is visible rather than implied.

Investment Management with Python and Machine Learning

- Introduction to Portfolio Construction and Analysis with Python
- Advanced Portfolio Construction and Analysis with Python
- Python and Machine Learning for Asset Management
- Python and Machine-Learning for Asset Management with Alternative Data Sets

Data Privacy, Ethics, and Responsible AI

- Building Trust: Ethics for AI-powered Chatbots
- Fundamental Rights Impact Assessment for GenAI Projects
- User Awareness and Education for Generative AI
- Introduction to Prompt Injection Vulnerabilities
- Data Privacy and Protection Standards
- AI and European Union Law: Navigating Regulatory Compliance

AI Automation Engineer with n8n

- Workflow Automation with n8n: Logic, Data & Error Handling
- Integrate AI Models in n8n: Prompt Engineering & Outputs
- Build AI Agents & Secure API Integrations with n8n
- AI Memory Systems: Production RAG Pipelines with n8n
- Build MCP Automation Projects with n8n: Connect AI Clients
- Multi-Agent Systems Design: AI Customer Support with n8n
- Deploy, Test & Secure AI Workflows with n8n

Managing AI Systems: Development, Deployment, and Governance

- AI Systems Design: RAG Pipelines and LLM Architecture
- MLOps and LLMOps: Deploying and Scaling AI in Production
- AI Risk and Compliance: Audit and Governance Foundations

AI Governance & ISO 42001 Readiness

- ISO/IEC 22989:2023 — Fundamentals of AI
- AI System Impact Assessment Guidance
- AI Management Essentials: ISO 42001 & ISO 23894
- Foundations of the EU AI Act
- Approaches to Establish Trust in AI Systems

Evidence beyond the role description

Verified achievements across scholarship, creative recognition, publishing, open source, product delivery and teaching.

ACHIEVEMENTS & RECOGNITION

Rafael del Pino Foundation scholarship
Named in the Foundation’s official 2012 annual report for study at Li Po Chun United World College of Hong Kong.

Youth Prize · II Nogarejas Poetry Competition
Awarded in 2012 for “Olvidaste una llave en mi costado”, submitted as “El arte de la fuga”, from an international field of more than 200 works.

Published author · ChinoTotal
Wrote and independently published a 296-page Spanish-language Mandarin course from zero to HSK2/A2 in 2024. ISBN 9798873249237.

Open-source engineering recognition
VUDA visual UI diagnosis reached 80 GitHub stars / 7 forks; the SMTP MCP Server reached 17 stars / 15 forks at the verified snapshot.

Multiplatform product delivery
Built OULANG across production web and native iOS/Android delivery, then extended the platform approach into Huatong and OUPIN.

Teaching and implementation archive
111 verified lesson, meeting and project media files totalling approximately 125.83 hours, alongside 12 public Hugging Face articles.

HOW I TAKE AN AI SYSTEM TO PRODUCTION
