Sami Halawa Ribas

has successfully completed the online Specialization

Agentic AI Engineering

This is to certify that the learner has successfully completed this specialization and demonstrated the ability to design and implement intelligent AI systems using modern agent frameworks such as LangChain, LangGraph, and the Model Context Protocol (MCP). The learner has demonstrated proficiency in building agent-based workflows that integrate reasoning, tools, memory, and stateful execution to address complex, multi-step problems. The specialization has also developed the learner's capability to architect reliable and responsible AI solutions, incorporating validation, observability, and ethical AI practices. The learner is well-prepared to build dependable agent-based systems that support automation, research, decision-making, and real-world integration across diverse application domains.

This certificate attests to the learner's completion of an online program delivered via Coursera. It does not constitute formal enrollment at any university or entity and does not itself grant academic credit, grades, or a degree. Institutions or organizations may, at their discretion, recognize this learning toward their own programs or credentials.
