

7 Courses

Workflow Automation with n8n: Logic, Data & Error Handling

Integrate AI Models in n8n: Prompt Engineering & Outputs

Build AI Agents & Secure API Integrations with n8n

AI Memory Systems: Production RAG Pipelines with n8n

Build MCP Automation Projects with n8n: Connect AI Clients

Multi-Agent Systems Design: AI Customer Support with n8n

Deploy, Test & Secure AI Workflows with n8n

Jul 27, 2026

Sami Halawa Ribas

has successfully completed the online Specialization

AI Automation Engineer with n8n

This certifies that the learner has successfully completed the AI Automation Engineer with n8n Specialization, demonstrating practical skills in designing and deploying AI-powered automation systems. The learner has gained expertise in workflow automation using n8n, including logic design, data handling, and error management. Learner has developed skills in integrating AI models with prompt engineering for structured outputs, building AI agents, and implementing secure API integrations. The learner is proficient in creating production-ready AI memory systems and RAG pipelines, MCP-based automation projects, multi-agent systems for customer support, and deploying, testing, and securing AI workflows for real-world applications.
